 * | left|                   |right|
 * |<--->|                   |<--->|
 * |      +-----+          |
 * \            ^              /
 *  \          v bottom        .'
 *   "-----"
 *
 * The idea is that the top/left of the arrow container box does not move to a
 * coordinate smaller than the top/left of the guide and the right/bottom of
 * the arrow container box does not move to a coordinate larger than the
 * bottom/right of the guide. This will help us avoid the following situation:
 *
 * ..-----..
 *  ."          ^ top          ".
 * /||          v              \
 * / |      +-----+          |
 * \ |      |                   |
 * \ | left|                   |right|

```

```

*      |<--->|                |<--->|
*      |      +-----+      |
*      \      ^              /
*      \      v bottom      /
*      "-----"
* The arrow should not receive a top/left coordinate such that it is too close
* to one of the corners, because then at first the shadow of the arrow and,
* given a coordinate even closer to the corner, even the body of the arrow will
* "stick out" of the corner of the popup. The guide provides a hint to the
* arrow positioning code as to which range of values is acceptable for the
* arrow container's top/left coordinate.
